Q3 2018

Q2 2018

Median Percent of Original List Price Received

be better served by paying attention to trends in the two components

of Dollar Volume (i.e. sales and prices) individually.

The median of the sale price (as a percentage of the original list price) across all properties selling during the quarter

Economists' note : The Median Percent of Original List Price Received is useful as an indicator of market recovery, since it typically rises as buyers realize that the market may be moving away from them and they need to match the selling price (or better it) in order to get a contract on the house. This is usually the last measure to indicate a market has shifted from down to up, so it is what we would call a *lagging* indicator.

Med. Pct. of Orig.

Percent Change Median Time to Median Time to Contract Quarter Contract Voor over Ver The median number of days between the listing date and contract date for all Closed Sales during the guarter *Economists' note* : Like Time to Sale, Time to Contract is a measure of the length of the home selling process calculated for sales which closed during the quarter. The difference is that Time to Contract measures the number of days between the initial listing of a property and the

signing of the contract which eventually led to the closing of the sale. When the gap between Median Time to Contract and Median Time to Sale grows, it is usually a sign of longer closing times and/or declining numbers of cash sales.

Median Time to Sale

Median Time to

The median number of days between the listing date and closing date for all Closed Sales during the quarter

Economists' note : Time to Sale is a measure of the length of the home selling process, calculated as the number of days between the initial listing of a property and the closing of the sale. *Median* Time to Sale is the amount of time the "middle" property selling this month was on the market. That is, 50% of homes selling this month took *less* time to sell, and 50% of homes took more time to sell. Median Time to Sale gives a more accurate picture than Average Time to Sale, which can be skewed upward by small numbers of properties taking an abnormally long time to sell.

New Listings

The number of properties put onto the market during the quarter

Economists' note : New Listings tend to rise in delayed response to increasing prices, so they are often seen as a lagging indicator of market health. As prices rise, potential sellers raise their estimations of value—and in the most recent cycle, rising prices have freed up many potential sellers who were previously underwater on their mortgages. Note that in our calculations, we take care to not include properties that were recently taken off the market and quickly relisted, since these are not really *new* listings.

| Quarter | New Listings | Percent Change Year-over-Year |

Months Supply of Inventory

An estimate of the number of months it will take to deplete the current Inventory given recent sales rates

Listings aren't keeping up with the rate at which homes are going off-

Economists' note : MSI is a useful indicator of market conditions. The benchmark for a balanced market (favoring neither buyer nor seller) is 5.5 months of inventory. Anything higher is traditionally a buyers' market, and anything lower is a sellers' market. There is no single accepted way of calculating MSI. A common method is to divide current Inventory by the most recent month's Closed Sales count, but this count is a usually poor predictor of future Closed Sales due to seasonal cycles. To eliminate seasonal effects, we use the 12-month average of monthly Closed Sales instead.

| Quarter | Months Supply | Percent Change Year-over-Year |

market.

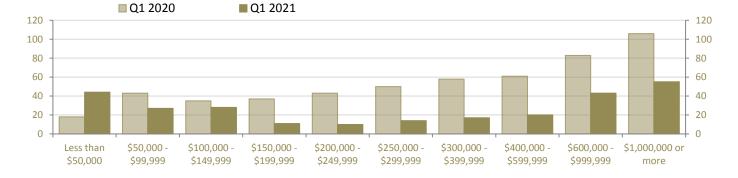

Percent Change **Closed Sales by Sale Price** Sale Price **Closed Sales** Year-over-Year Less than \$50,000 9 50.0% The number of sales transactions which closed during \$50,000 - \$99,999 20 -28.6% the guarter \$100,000 - \$149,999 49 -40.2% \$150,000 - \$199,999 -38.8% Economists' note: Closed Sales are one of the simplest-yet most 148 important-indicators for the residential real estate market. When \$200,000 - \$249,999 -23.2% 377 comparing Closed Sales across markets of different sizes, we \$250,000 - \$299,999 18.6% 434 recommend comparing the percent changes in sales rather than the \$300,000 - \$399,999 539 87.2% number of sales. Closed Sales (and many other market metrics) are affected by seasonal cycles, so actual trends are more accurately \$400,000 - \$599,999 320 63.3% represented by year-over-year changes (i.e. comparing a quarter's \$600.000 - \$999,999 165 91.9% sales to the amount of sales in the same quarter in the previous year), \$1,000,000 or more 101 180.6% rather than changes from one quarter to the next.

Median Time to Contract by Sale Price The median number of days between the listing date and contract date for all Closed Sales during the quarter

Economists' note : Like Time to Sale, Time to Contract is a measure of the length of the home selling process calculated for sales which closed during the quarter. The difference is that Time to Contract measures the number of days between the initial listing of a property and the signing of the contract which eventually led to the closing of the sale. When the gap between Median Time to Contract and Median Time to Sale grows, it is usually a sign of longer closing times and/or declining numbers of cash sales.

| Sale Price | Median Time to Contract | Percent Change Year-over-Year |
|-----------------------|----------------------------|----------------------------------|
| Less than \$50,000 | 44 Days | 144.4% |
| \$50,000 - \$99,999 | 27 Days | -37.2% |
| \$100,000 - \$149,999 | 28 Days | -20.0% |
| \$150,000 - \$199,999 | 11 Days | -70.3% |
| \$200,000 - \$249,999 | 10 Days | -76.7% |
| \$250,000 - \$299,999 | 14 Days | -72.0% |
| \$300,000 - \$399,999 | 17 Days | -70.7% |
| \$400,000 - \$599,999 | 20 Days | -67.2% |
| \$600,000 - \$999,999 | 43 Days | -48.2% |
| \$1,000,000 or more | 55 Days | -48.1% |

New Listings by Initial Listing Price

The number of properties put onto the market during the quarter

Economists' note: New Listings tend to rise in delayed response to increasing prices, so they are often seen as a lagging indicator of market health. As prices rise, potential sellers raise their estimations of value—and in the most recent cycle, rising prices have freed up many potential sellers who were previously underwater on their mortgages. Note that in our calculations, we take care to not include properties that were recently taken off the market and quickly relisted, since these are not really *new* listings.

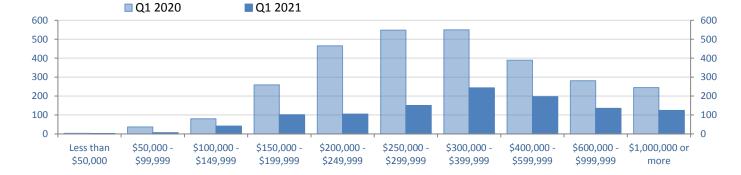

| | Initial Listing Price | New Listings | Percent Change Year-over-Year | |
|--------------------|-----------------------|--------------|----------------------------------|--|
| Less than \$50,000 | | 10 | -9.1% | |
| | \$50,000 - \$99,999 | 17 | -52.8% | |
| | \$100,000 - \$149,999 | 68 | -29.2% | |
| | \$150,000 - \$199,999 | 202 | -42.9% | |
| | \$200,000 - \$249,999 | 442 | -38.1% | |
| | \$250,000 - \$299,999 | 601 | -11.9% | |
| | \$300,000 - \$399,999 | 792 | 42.2% | |
| | \$400,000 - \$599,999 | 473 | 34.0% | |
| | \$600,000 - \$999,999 | 230 | 29.2% | |
| | \$1,000,000 or more | 167 | 54.6% | |

Inventory by Current Listing Price The number of property listings active at the end of the quarter

Economists' note : There are a number of ways to define and calculate Inventory. Our method is to simply count the number of active listings on the last day of the quarter, and hold this number to compare with the same quarter the following year. Inventory rises when New Listings are outpacing the number of listings that go off-market (regardless of whether they actually sell). Likewise, it falls when New Listings aren't keeping up with the rate at which homes are going offmarket.

| | Current Listing Price | Inventory | Percent Change Year-over-Year | |
|---|-----------------------|-----------|----------------------------------|--|
| l | Less than \$50,000 | 2 | -33.3% | |
| l | \$50,000 - \$99,999 | 7 | -81.1% | |
| | \$100,000 - \$149,999 | 41 | -48.8% | |
| | \$150,000 - \$199,999 | 101 | -61.0% | |
| | \$200,000 - \$249,999 | 105 | -77.4% | |
| | \$250,000 - \$299,999 | 150 | -72.6% | |
| | \$300,000 - \$399,999 | 243 | -55.8% | |
| | \$400,000 - \$599,999 | 197 | -49.4% | |
| | \$600,000 - \$999,999 | 135 | -52.0% | |
| | \$1,000,000 or more | 124 | -49.4% | |
