Keep in mind Q3 2019 \$235,000 4.5% that median price trends over time are not always solely caused by Q2 2019 \$232,400 5.6% changes in the general value of local real estate. Median sale price only Q1 2019 \$227,000 5.6%

Q4 2018

Q3 2018

Average Sale Price

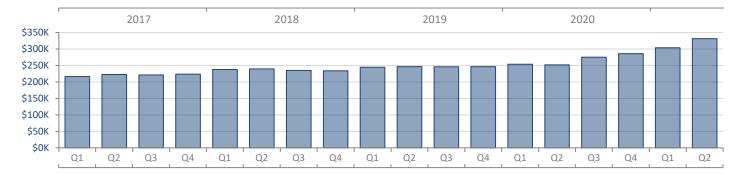

The average sale price reported for the quarter (i.e. total sales in dollars divided by the number of sales)

reflects the values of the homes that *sold* each quarter, and the mix of

the types of homes that sell can change over time.

Economists' note : Usually, we prefer Median Sale Price over Average Sale Price as a summary statistic for home prices. However, Average Sale Price does have its uses—particularly when it is analyzed alongside the Median Sale Price. For one, the relative difference between the two statistics can provide some insight into the market for higher-end homes in an area.

Q3 2018

Median Percent of Original List Price Received

of Dollar Volume (i.e. sales and prices) individually.

The median of the sale price (as a percentage of the original list price) across all properties selling during the quarter

Economists' note : The Median Percent of Original List Price Received is useful as an indicator of market recovery, since it typically rises as buyers realize that the market may be moving away from them and they need to match the selling price (or better it) in order to get a contract on the house. This is usually the last measure to indicate a market has shifted from down to up, so it is what we would call a *lagging* indicator.

| Quarter | Med. Pct. of Orig. List Price Received | Percent Change Year-over-Year |
|--------------|---|----------------------------------|
| Year-to-Date | 100.0% | 3.1% |

Median Time to

Contract

The median number of days between the listing date and closing date for all Closed Sales during the quarter

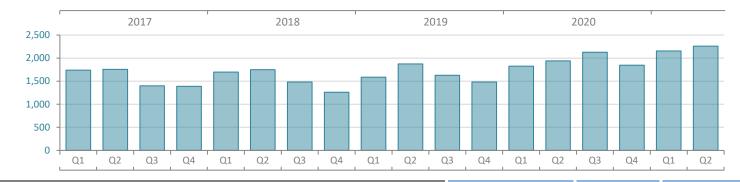

Economists' note : Time to Sale is a measure of the length of the home selling process, calculated as the number of days between the initial listing of a property and the closing of the sale. *Median* Time to Sale is the amount of time the "middle" property selling this month was on the market. That is, 50% of homes selling this month took *less* time to sell, and 50% of homes took more time to sell. Median Time to Sale gives a more accurate picture than Average Time to Sale, which can be skewed upward by small numbers of properties taking an abnormally long time to sell.

| Year-to-Date 58 Days -36.3% Q2 2021 56 Days -39.1% Q1 2021 62 Days -29.5% Q4 2020 66 Days -17.5% |

Q2 2018

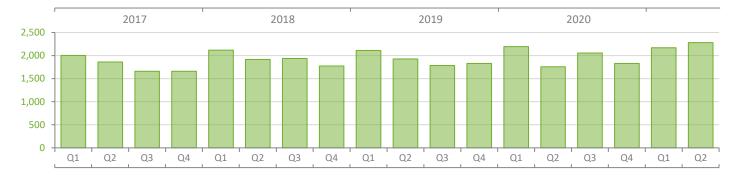

New Listings The number of properties put onto the market during the quarter

Economists' note : New Listings tend to rise in delayed response to increasing prices, so they are often seen as a lagging indicator of market health. As prices rise, potential sellers raise their estimations of value—and in the most recent cycle, rising prices have freed up many potential sellers who were previously underwater on their mortgages. Note that in our calculations, we take care to not include properties that were recently taken off the market and quickly relisted, since these are not really *new* listings.

| Quarter | New Listings | Percent Change Year-over-Year |

Q3 2018

Months Supply of Inventory

An estimate of the number of months it will take to deplete the current Inventory given recent sales rates

Economists' note : MSI is a useful indicator of market conditions. The benchmark for a balanced market (favoring neither buyer nor seller) is 5.5 months of inventory. Anything higher is traditionally a buyers' market, and anything lower is a sellers' market. There is no single accepted way of calculating MSI. A common method is to divide current Inventory by the most recent month's Closed Sales count, but this count is a usually poor predictor of future Closed Sales due to seasonal cycles. To eliminate seasonal effects, we use the 12-month average of monthly Closed Sales instead.

| Quarter | Months Supply | Percent Change Year-over-Year |
|-------------------|---------------|----------------------------------|
| YTD (Monthly Avg) | 1.3 | -62.9% |
| Q2 2021 | 1.0 | -63.0% |

market.

Closed Sales by Sale Price

The number of sales transactions which closed during the quarter

Economists' note: Closed Sales are one of the simplest—yet most important—indicators for the residential real estate market. When comparing Closed Sales across markets of different sizes, we recommend comparing the percent changes in sales rather than the number of sales. Closed Sales (and many other market metrics) are affected by seasonal cycles, so actual trends are more accurately represented by year-over-year changes (i.e. comparing a quarter's sales to the amount of sales in the same quarter in the previous year), rather than changes from one quarter to the next.

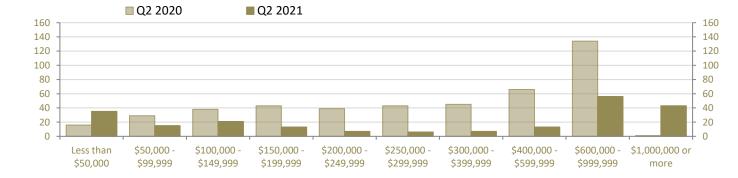

| Sale Price | Closed Sales | Percent Change Year-over-Year |
|-----------------------|--------------|----------------------------------|
| Less than \$50,000 | 3 | -57.1% |
| \$50,000 - \$99,999 | 23 | -20.7% |
| \$100,000 - \$149,999 | 56 | -3.4% |
| \$150,000 - \$199,999 | 127 | -49.0% |
| \$200,000 - \$249,999 | 319 | -33.4% |
| \$250,000 - \$299,999 | 504 | 45.2% |
| \$300,000 - \$399,999 | 680 | 235.0% |
| \$400,000 - \$599,999 | 285 | 408.9% |
| \$600,000 - \$999,999 | 56 | 409.1% |
| \$1,000,000 or more | 20 | 566.7% |

Median Time to Contract by Sale Price The median number of days between the listing date and contract date for all Closed Sales during the quarter

Economists' note : Like Time to Sale, Time to Contract is a measure of the length of the home selling process calculated for sales which closed during the quarter. The difference is that Time to Contract measures the number of days between the initial listing of a property and the signing of the contract which eventually led to the closing of the sale. When the gap between Median Time to Contract and Median Time to Sale grows, it is usually a sign of longer closing times and/or declining numbers of cash sales.

| Sale Price | Median Time to Contract | Percent Change Year-over-Year |
|-----------------------|----------------------------|----------------------------------|
| Less than \$50,000 | 35 Days | 118.8% |
| \$50,000 - \$99,999 | 15 Days | -48.3% |
| \$100,000 - \$149,999 | 21 Days | -44.7% |
| \$150,000 - \$199,999 | 13 Days | -69.8% |
| \$200,000 - \$249,999 | 7 Days | -82.1% |
| \$250,000 - \$299,999 | 6 Days | -86.0% |
| \$300,000 - \$399,999 | 7 Days | -84.4% |
| \$400,000 - \$599,999 | 13 Days | -80.3% |
| \$600,000 - \$999,999 | 56 Days | -58.2% |
| \$1.000.000 or more | 43 Days | 4200.0% |

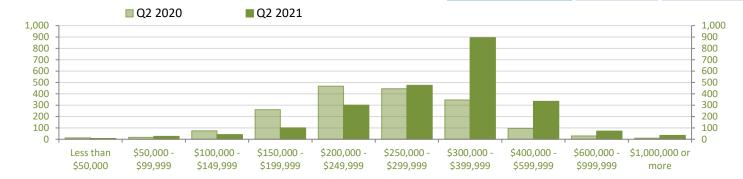

New Listings by Initial Listing Price

The number of properties put onto the market during the quarter

Economists' note: New Listings tend to rise in delayed response to increasing prices, so they are often seen as a lagging indicator of market health. As prices rise, potential sellers raise their estimations of value—and in the most recent cycle, rising prices have freed up many potential sellers who were previously underwater on their mortgages. Note that in our calculations, we take care to not include properties that were recently taken off the market and quickly relisted, since these are not really new listings.

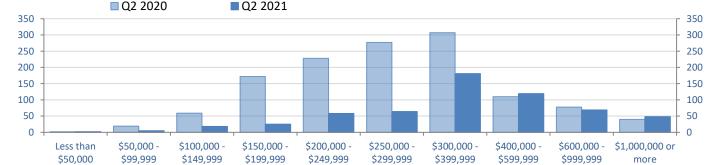

| | Initial Listing Price | New Listings | Percent Change Year-over-Year | |
|--|-----------------------|--------------|----------------------------------|--|
| | Less than \$50,000 | 7 | -41.7% | |
| | \$50,000 - \$99,999 | 25 | 47.1% | |
| | \$100,000 - \$149,999 | 40 | -46.7% | |
| | \$150,000 - \$199,999 | 100 | -61.5% | |
| | \$200,000 - \$249,999 | 299 | -36.0% | |
| | \$250,000 - \$299,999 | 475 | 6.7% | |
| | \$300,000 - \$399,999 | 894 | 158.4% | |
| | \$400,000 - \$599,999 | 334 | 251.6% | |
| | \$600,000 - \$999,999 | 72 | 148.3% | |
| | \$1,000,000 or more | 33 | 230.0% | |

Inventory by Current Listing Price The number of property listings active at the end of the quarter

Economists' note : There are a number of ways to define and calculate Inventory. Our method is to simply count the number of active listings on the last day of the quarter, and hold this number to compare with the same quarter the following year. Inventory rises when New Listings are outpacing the number of listings that go off-market (regardless of whether they actually sell). Likewise, it falls when New Listings aren't keeping up with the rate at which homes are going offmarket.

| Current Listing Price | Inventory | Year-over-Year |
|-----------------------|-----------|----------------|
| Less than \$50,000 | 2 | 0.0% |
| \$50,000 - \$99,999 | 5 | -73.7% |
| \$100,000 - \$149,999 | 18 | -69.5% |
| \$150,000 - \$199,999 | 25 | -85.5% |
