the types of homes that sell can change over time.

Percent Change Median Sale Price Month Median Sale Price Year-over-Year Year-to-Date \$523,175 16.3% The median sale price reported for the month (i.e. 50% January 2022 \$523,175 16.3% December 2021 42.4% \$569,500 of sales were above and 50% of sales were below) November 2021 \$549,500 28.0% October 2021 \$495,000 19.2% *Economists' note* : Median Sale Price is our preferred summary September 2021 12.2% \$455,000 statistic for price activity because, unlike Average Sale Price, Median August 2021 16.5% \$495,000 Sale Price is not sensitive to high sale prices for small numbers of July 2021 \$475,500 16.7% homes that may not be characteristic of the market area. Keep in mind June 2021 \$490,000 19.5% that median price trends over time are not always solely caused by May 2021 \$469,900 28.7% changes in the general value of local real estate. Median sale price only April 2021 \$490,000 39.2% March 2021 \$489,000 30.4% reflects the values of the homes that sold each month, and the mix of

February 2021

Average Sale Price

The average sale price reported for the month (i.e. total sales in dollars divided by the number of sales)

Economists' note : Usually, we prefer Median Sale Price over Average Sale Price as a summary statistic for home prices. However, Average Sale Price does have its uses—particularly when it is analyzed alongside the Median Sale Price. For one, the relative difference between the two statistics can provide some insight into the market for higher-end homes in an area.

Month	Average Sale Price	Percent Change Year-over-Year
Year-to-Date	\$1,034,061	42.1%

Average Sale Price

Dollar Volume

The sum of the sale prices for all sales which closed during the month

Economists' note : Dollar Volume is simply the sum of all sale prices in a given time period, and can quickly be calculated by multiplying Closed Sales by Average Sale Price. It is a strong indicator of the health of the real estate industry in a market, and is of particular interest to real estate professionals, investors, analysts, and government agencies. Potential home sellers and home buyers, on the other hand, will likely be better served by paying attention to trends in the two components of Dollar Volume (i.e. sales and prices) individually.

Month	Dollar Volume	Percent Change Year-over-Year
Year-to-Date	\$146.8 Million	16.0%
January 2022	\$146.8 Million	16.0%
December 2021	\$201.8 Million	23.5%

May 2021	\$262.6 Million	279.2%
April 2021	\$296.1 Million	219.0%
March 2021	\$250.4 Million	128.6%
February 2021	\$148.9 Million	39.3%
January 2021	\$126.6 Million	75.9%

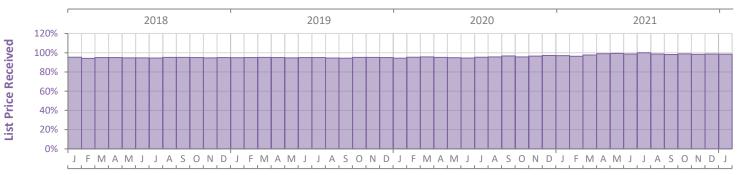

Median Percent of Original List Price Received

The median of the sale price (as a percentage of the original list price) across all properties selling during the month

Economists' note : The Median Percent of Original List Price Received is useful as an indicator of market recovery, since it typically rises as buyers realize that the market may be moving away from them and they need to match the selling price (or better it) in order to get a contract on the house. This is usually the last measure to indicate a market has shifted from down to up, so it is what we would call a *lagging* indicator.

Month	Med. Pct. of Orig. List Price Received	Percent Change Year-over-Year
Year-to-Date	98.4%	1.4%
January 2022	98.4%	1.4%
December 2021	98.6%	1.4%
November 2021	98.3%	1.9%

Med. Pct. of Orig.

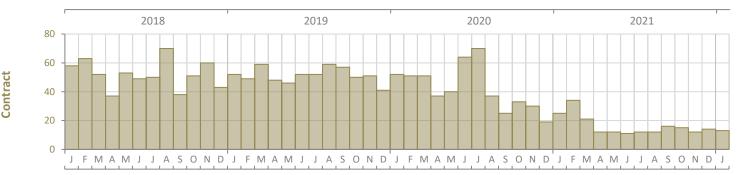

Median Time to Contract

The median number of days between the listing date and contract date for all Closed Sales during the month

Economists' note : Like Time to Sale, Time to Contract is a measure of the length of the home selling process calculated for sales which closed during the month. The difference is that Time to Contract measures the number of days between the initial listing of a property and the signing of the contract which eventually led to the closing of the sale. When the gap between Median Time to Contract and Median Time to Sale grows, it is usually a sign of longer closing times and/or declining numbers of cash sales.

Month	Median Time to Contract	Percent Change Year-over-Year
Year-to-Date	13 Days	-48.0%
January 2022	13 Days	-48.0%
December 2021	14 Days	-26.3%
November 2021	12 Days	-60.0%
October 2021	15 Days	-54.5%
September 2021	16 Days	-36.0%
August 2021	12 Days	-67.6%
July 2021	12 Days	-82.9%
June 2021	11 Days	-82.8%
May 2021	12 Days	-70.0%
April 2021	12 Days	-67.6%
March 2021	21 Days	-58.8%
February 2021	34 Days	-33.3%
January 2021	25 Days	-51.9%

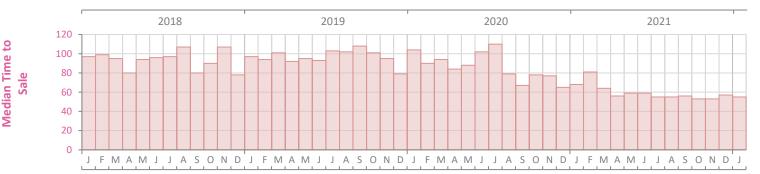

Median Time to Sale

Median Time to

The median number of days between the listing date and closing date for all Closed Sales during the month

Economists' note : Time to Sale is a measure of the length of the home selling process, calculated as the number of days between the initial listing of a property and the closing of the sale. *Median* Time to Sale is the amount of time the "middle" property selling this month was on the market. That is, 50% of homes selling this month took *less* time to sell, and 50% of homes took *more* time to sell. Median Time to Sale gives a more accurate picture than Average Time to Sale, which can be skewed upward by small numbers of properties taking an abnormally long time to sell.

Month	Median Time to Sale	Percent Change Year-over-Year
Year-to-Date	55 Days	-19.1%
January 2022	55 Days	-19.1%
December 2021	57 Days	-12.3%
November 2021	53 Days	-31.2%
October 2021	53 Days	-32.1%
September 2021	56 Days	-16.4%
August 2021	55 Days	-30.4%
July 2021	55 Days	-50.0%
June 2021	59 Days	-42.2%
May 2021	59 Days	-33.0%
April 2021	56 Days	-33.3%
March 2021	64 Days	-31.9%
February 2021	81 Days	-10.0%
January 2021	68 Days	-34.6%

New Listings The number of properties put onto the market during the month

availability of financing for homebuyers and the inventory of

distressed properties for sale.

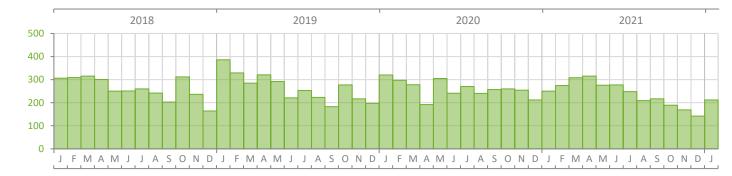

Economists' note : New Listings tend to rise in delayed response to increasing prices, so they are often seen as a lagging indicator of market health. As prices rise, potential sellers raise their estimations of value—and in the most recent cycle, rising prices have freed up many potential sellers who were previously underwater on their mortgages. Note that in our calculations, we take care to not include properties that were recently taken off the market and quickly relisted, since these are not really new listings.

Month	New Listings	Percent Change Year-over-Year

Months Supply of Inventory

An estimate of the number of months it will take to deplete the current Inventory given recent sales rates

Economists' note : MSI is a useful indicator of market conditions. The benchmark for a balanced market (favoring neither buyer nor seller) is 5.5 months of inventory. Anything higher is traditionally a buyers' market, and anything lower is a sellers' market. There is no single accepted way of calculating MSI. A common method is to divide current Inventory by the most recent month's Closed Sales count, but this count is a usually poor predictor of future Closed Sales due to seasonal cycles. To eliminate seasonal effects, we use the 12-month average of monthly Closed Sales instead.

Month	Months Supply	Percent Change Year-over-Year
YTD (Monthly Avg)	0.7	-61.1%
January 2022	0.7	-61.1%
December 2021	0.8	-63.6%
November 2021	1.0	-56.5%
