# Cash Sales as a Percentage of Closed Sales

The percentage of Closed Sales during the month which were Cash Sales

*Economists' note* : This statistic is simply another way of viewing Cash Sales. The remaining percentages of Closed Sales (i.e. those not paid fully in cash) each month involved some sort of financing, such as mortgages, owner/seller financing, assumed loans, etc.

| Month          | Percent of Closed<br>Sales Paid in Cash | Percent Change<br>Year-over-Year |
|----------------|---|----------------------------------|
| Year-to-Date   | 47.1%                                   | 3.1%                             |
| March 2024     | 45.5%                                   | 6.3%                             |
| February 2024  | 47.3%                                   | 0.6%                             |
| January 2024   | 49.3%                                   | -0.2%                            |
| December 2023  | 45.8%                                   | 0.2%                             |
| November 2023  | 46.8%                                   | 4.5%                             |
| October 2023   | 47.9%                                   | 17.4%                            |
| September 2023 | 44.4%                                   | 7.0%                             |
| August 2023    | 42.8%                                   | 4.1%                             |
| July 2023      | 42.9%                                   | -3.8%                            |
| June 2023      | 42.9%                                   | -8.3%                            |

# Average Sale Price

The average sale price reported for the month (i.e. total sales in dollars divided by the number of sales)

*Economists' note* : Usually, we prefer Median Sale Price over Average Sale Price as a summary statistic for home prices. However, Average Sale Price does have its uses—particularly when it is analyzed alongside the Median Sale Price. For one, the relative difference between the two statistics can provide some insight into the market for higher-end homes in an area.

| Month          | Average Sale Price | Percent Change<br>Year-over-Year |
|----------------|--------------------|----------------------------------|
| Year-to-Date   | \$1,135,279        | 19.4%                            |
| March 2024     | \$1,196,445        | 32.4%                            |
| February 2024  | \$1,031,540        | 13.3%                            |
| January 2024   | \$1,174,056        | 7.9%                             |
| December 2023  | \$930,333          | 12.7%                            |
| November 2023  | \$926,528          | 2.9%                             |
| October 2023   | \$908,152          | -2.1%                            |
| September 2023 | \$946,935          | 10.1%                            |
| August 2023    | \$895,426          | 1.4%                             |
| July 2023      | \$1,081,138        | 12.9%                            |
| June 2023      | \$1,066,235        | -9.9%                            |
| May 2023       | \$1,164,938        | 16.4%                            |
| April 2023     | \$1,015,585        | -6.5%                            |
| March 2023     | \$903,891          | -6.9%                            |

**Average Sale Price** 

## **Dollar Volume**

The sum of the sale prices for all sales which closed during the month

*Economists' note* : Dollar Volume is simply the sum of all sale prices in a given time period, and can quickly be calculated by multiplying Closed Sales by Average Sale Price. It is a strong indicator of the health of the real estate industry in a market, and is of particular interest to real estate professionals, investors, analysts, and government agencies. Potential home sellers and home buyers, on the other hand, will likely be better served by paying attention to trends in the two components of Dollar Volume (i.e. sales and prices) individually.

| Month          | Dollar Volume   | Percent Change<br>Year-over-Year |
|----------------|-----------------|----------------------------------|
| Year-to-Date   | \$3.5 Billion   | 13.1%                            |
| March 2024     | \$1.5 Billion   | 10.8%                            |
| February 2024  | \$1.1 Billion   | 19.2%                            |
| January 2024   | \$952.2 Million | 10.2%                            |
| December 2023  | \$901.5 Million | 9.3%                             |
| November 2023  | \$846.8 Million | 2.3%                             |
| October 2023   | \$986.3 Million | 1.3%                             |
| September 2023 | \$1.0 Billion   | 3.7%                             |
| August 2023    | \$1.1 Billion   | -2.0%                            |
| July 2023      | \$1.3 Billion   | 10.5%                            |
| June 2023      | \$1.5 Billion   | -12.5%                           |
| May 2023       | \$1.7 Billion   | 11.3%                            |
| April 2023     | \$1.3 Billion   | -20.5%                           |
| March 2023     | \$1.3 Billion   | -14.2%                           |

# Median Percent of Original List Price Received

The median of the sale price (as a percentage of the original list price) across all properties selling during the month

*Economists' note* : The Median Percent of Original List Price Received is useful as an indicator of market recovery, since it typically rises as buyers realize that the market may be moving away from them and they need to match the selling price (or better it) in order to get a contract on the house. This is usually the last measure to indicate a market has shifted from down to up, so it is what we would call a *lagging* indicator.

| Month          | Med. Pct. of Orig.<br>List Price Received | Percent Change<br>Year-over-Year |
|----------------|---|----------------------------------|
| Year-to-Date   | 94.5%                                     | 0.5%                             |
| March 2024     | 94.6%                                     | -0.2%                            |

# Median Time to Contract

The median number of days between the listing date and contract date for all Closed Sales during the month

*Economists' note* : Like Time to Sale, Time to Contract is a measure of the length of the home selling process calculated for sales which closed during the month. The difference is that Time to Contract measures the number of days between the initial listing of a property and the signing of the contract which eventually led to the closing of the sale. When the gap between Median Time to Contract and Median Time to Sale grows, it is usually a sign of longer closing times and/or declining numbers of cash sales.

| Month          | Median Time to<br>Contract | Percent Change<br>Year-over-Year |
|----------------|----------------------------|----------------------------------|
| Year-to-Date   | 40 Days                    | 2.6%                             |
| March 2024     | 35 Days                    | 12.9%                            |
| February 2024  | 38 Days                    | -2.6%                            |
| January 2024   | 38 Days                    | -7.3%                            |
| December 2023  | 29 Days                    | -19.4%                           |
| November 2023  | 24 Days                    | -25.0%                           |
| October 2023   | 21 Days                    | -25.0%                           |
| September 2023 | 24 Days                    | 9.1%                             |
| August 2023    | 24 Days                    | 33.3%                            |
| July 2023      | 22 Days                    | 57.1%                            |

| May 2023       | 27 Days                    | 145.5%                           |
| April 2023     | 30 Days                    | 233.3%                           |
| March 2023     | 31 Days                    | 210.0%                           |

# Median Time to Sale

The median number of days between the listing date and closing date for all Closed Sales during the month

*Economists' note* : Time to Sale is a measure of the length of the home selling process, calculated as the number of days between the initial listing of a property and the closing of the sale. *Median* Time to Sale is the amount of time the "middle" property selling this month was on the market. That is, 50% of homes selling this month took *less* time to sell, and 50% of homes took *more* time to sell. Median Time to Sale gives a more accurate picture than Average Time to Sale, which can be skewed upward by small numbers of properties taking an abnormally long time to sell.

| Month          | Median Time to Sale | Percent Change<br>Year-over-Year |
|----------------|---------------------|----------------------------------|
| Year-to-Date   | 81 Days             | 0.0%                             |
| March 2024     | 76 Days             | 4.1%                             |
| February 2024  | 78 Days             | -3.7%                            |
| January 2024   | 82 Days             | -3.5%                            |
| December 2023  | 68 Days             | -11.7%                           |
| November 2023  | 64 Days             | -14.7%                           |
| October 2023   | 64 Days             | -9.9%                            |

# New Listings The number of properties put onto the market during

the month *Economists' note* : New Listings tend to rise in delayed response to increasing prices, so they are often seen as a lagging indicator of meriod backhard the arrives rise meteratical college trains their estimations.

market health. As prices rise, potential sellers raise their estimations of value—and in the most recent cycle, rising prices have freed up many potential sellers who were previously underwater on their mortgages. Note that in our calculations, we take care to not include properties that were recently taken off the market and quickly relisted, since these are not really *new* listings.

| Month          | New Listings | Percent Change<br>Year-over-Year |

|   | October 2023      | 4,224     | -1.4%                      |
| on the last day of the month, and hold this number to compare with the  | September 2023    | 3,765     | -5.3%                      |

on the last day of the month, and hold this number to compare with the same month the following year. Inventory rises when New Listings are outpacing the number of listings that go off-market (regardless of whether they actually sell). Likewise, it falls when New Listings aren't keeping up with the rate at which homes are going off-market.

# Months Supply of Inventory

An estimate of the number of months it will take to deplete the current Inventory given recent sales rates

*Economists' note* : MSI is a useful indicator of market conditions. The benchmark for a balanced market (favoring neither buyer nor seller) is 5.5 months of inventory. Anything higher is traditionally a buyers' market, and anything lower is a sellers' market. There is no single accepted way of calculating MSI. A common method is to divide current Inventory by the most recent month's Closed Sales count, but this count is a usually poor predictor of future Closed Sales due to seasonal cycles. To eliminate seasonal effects, we use the 12-month average of monthly Closed Sales instead.

| Month             | Months Supply | Percent Change<br>Year-over-Year |
|-------------------|---------------|----------------------------------|
| YTD (Monthly Avg) | 4.3           | 30.3%                            |
| March 2024        | 4.4           | 37.5%                            |
| February 2024     | 4.4           | 33.3%                            |
| January 2024      | 4.2           | 23.5%                            |
| December 2023     | 4.0           | 25.0%                            |
| November 2023     | 3.9           | 18.2%                            |

| March 2023        | 3.2           | 166.7%                           |

#### Percent Change **Closed Sales by Sale Price** Sale Price **Closed Sales** Year-over-Year The number of sales transactions which closed during the month Economists' note: Closed Sales are one of the simplest-yet most important-indicators for the residential real estate market. When comparing Closed Sales across markets of different sizes, we recommend comparing the percent changes in sales rather than the

number of sales. Closed Sales (and many other market metrics) are affected by seasonal cycles, so actual trends are more accurately represented by year-over-year changes (i.e. comparing a month's sales to the amount of sales in the same month in the previous year), rather than changes from one month to the next.

| Less than \$50,000    | 1   | N/A     |
|-----------------------|-----|---------|
| \$50,000 - \$99,999   | 0   | -100.0% |
| \$100,000 - \$149,999 | 9   | 12.5%   |
| \$150,000 - \$199,999 | 8   | -46.7%  |
| \$200,000 - \$249,999 | 16  | -61.9%  |
| \$250,000 - \$299,999 | 26  | -43.5%  |
| \$300,000 - \$399,999 | 123 | -34.6%  |
| \$400,000 - \$599,999 | 352 | -27.6%  |
| \$600,000 - \$999,999 | 365 | -8.5%   |
| \$1.000.000 or more   | 326 | 16.8%   |

## Median Time to Contract by Sale Price The median number of days between the listing date and contract date for all Closed Sales during the month

*Economists' note* : Like Time to Sale, Time to Contract is a measure of the length of the home selling process calculated for sales which closed during the month. The difference is that Time to Contract measures the number of days between the initial listing of a property and the signing of the contract which eventually led to the closing of the sale. When the gap between Median Time to Contract and Median Time to Sale grows, it is usually a sign of longer closing times and/or declining numbers of cash sales.

| Sale Price            | Median Time to<br>Contract | Percent Change<br>Year-over-Year |
|-----------------------|----------------------------|----------------------------------|
| Less than \$50,000    | 88 Days                    | N/A                              |
| \$50,000 - \$99,999   | (No Sales)                 | N/A                              |
| \$100,000 - \$149,999 | 23 Days                    | -48.9%                           |
| \$150,000 - \$199,999 | 38 Days                    | 72.7%                            |
| \$200,000 - \$249,999 | 47 Days                    | 67.9%                            |
| \$250,000 - \$299,999 | 31 Days                    | 14.8%                            |
| \$300,000 - \$399,999 | 25 Days                    | -13.8%                           |
| \$400,000 - \$599,999 | 25 Days                    | 4.2%                             |
| \$600,000 - \$999,999 | 33 Days                    | -13.2%                           |
| \$1,000,000 or more   | 65 Days                    | 35.4%                            |

Produced by Florida Realtors® with data provided by Florida's multiple listing services. Statistics for each month compiled from MLS feeds on the 15th day of the following month. Data released on Thursday, April 18, 2024. Next data release is Wednesday, May 22, 2024.

**Median Time to Contract** 

# New Listings by Initial Listing Price

March 2022

The number of properties put onto the market during the month

*Economists' note:* New Listings tend to rise in delayed response to increasing prices, so they are often seen as a lagging indicator of market health. As prices rise, potential sellers raise their estimations of value—and in the most recent cycle, rising prices have freed up many potential sellers who were previously underwater on their mortgages. Note that in our calculations, we take care to not include properties that were recently taken off the market and quickly relisted, since these are not really *new* listings.

March 2024

| Initial Listing Price | New Listings | Percent Change<br>Year-over-Year |
|-----------------------|--------------|----------------------------------|
| Less than \$50,000    | 0            | -100.0%                          |
| \$50,000 - \$99,999   | 2            | 0.0%                             |
| \$100,000 - \$149,999 | 12           | 200.0%                           |
| \$150,000 - \$199,999 | 16           | -51.5%                           |
| \$200,000 - \$249,999 | 21           | -12.5%                           |
| \$250,000 - \$299,999 | 49           | -12.5%                           |

#### Inventory by Current Listing Price The number of property listings active at the end of the month

*Economists' note* : There are a number of ways to define and calculate Inventory. Our method is to simply count the number of active listings on the last day of the month, and hold this number to compare with the same month the following year. Inventory rises when New Listings are outpacing the number of listings that go off-market (regardless of whether they actually sell). Likewise, it falls when New Listings aren't keeping up with the rate at which homes are going off-market.

| Current Listing Price | Inventory | Percent Change<br>Year-over-Year |
|-----------------------|-----------|----------------------------------|
| Less than \$50,000    | 1         | 0.0%                             |
| \$50,000 - \$99,999   | 4         | 33.3%                            |
| \$100,000 - \$149,999 | 50        | 400.0%                           |
| \$150,000 - \$199,999 | 60        | 62.2%                            |
| \$200,000 - \$249,999 | 68        | 61.9%                            |
| \$250,000 - \$299,999 | 119       | 0.0%                             |
| \$300,000 - \$399,999 | 348       | 40.3%                            |
| \$400,000 - \$599,999 | 904       | 24.7%                            |
| \$600,000 - \$999,999 | 1,422     | 49.5%                            |
| \$1,000,000 or more   | 2,090     | 20.1%                            |
